### 100% Pre-Shrunk Cotton

#### "SEW-Lutions That Breathe"

Pre-shrunk garments are garments that have already been initially washed and or compacted – thus, any additional washing will not shrink the garment significantly. Our products are specially designed and catered for South East Asia

weather which is hot and humid. The 100% cotton material can absorb sweat and hence worker will be more comfortable when working under hot sun environment. Made for protection, design for safety. Our safety apparels carry the "**SHAMARR**" brand name.

Fire Retardant Coverall (FRC) specially and specifically also made from Flame Retardant Fabric, comply with **NFPA 2112**.

American standard for garments that protect from flash fire. The standard demands that after being washed a hundred times, the garment is put on a mannequin and exposed to 3 seconds of direct flame. In order to accomplish the standard, the result must show less than 50% of body burn. FRC will not ignite or continue to burn when the flash fire is over caused by the rapid flash fire. It can protect you from fatal and catastrophic burn injuries with a single layer secondary personal protective apparel.
